New Delhi, India | <https://www.linkedin.com/in/aayush-kasaudhan-46a313247>

OBJECTIVE

Aspiring software developer skilled in Python, SQL, Flask, Firebase and Android development. Experienced in building secure networking apps, machine learning web projects and mobile applications. Eager to contribute technical skills and creativity to a growth-focused organization.

SKILLS AND TOOLS

- **Programming:** Python (Pandas, NumPy, Scikit-learn, Matplotlib, Flask, Seaborn), SQL, Kotlin
- **ML & Analytics:** Linear/Logistic Regression, Random Forest, Model Evaluation(AUC, ROC), Shap Explainability, Feature Important Analysis .
- **Data Handling:** Data Cleaning, Feature Scaling, Exploratory Data Analysis (EDA), Statistical Analysis.
- **Visualization:** Matplotlib, Seaborn, Chart.js, Interactive Dashboards, SHAP Summary Plots
- **Tools:** Jupyter Notebook, Android Studio, VS Code
- **Databases:** MySQL, Room Database (Android)
- **Web Development :** Flask, HTML, CSS, Chart.js, Bootstrap
- **Mobile Development :** Android Studio, Kotlin, Firebase Authentication, Google Sign-In API
- **Networking and Security :** Socket Programming, Threading, Cryptography (Fernet Encryption)

EDUCATION

B.Sc. (Hons.) Computer Science, Jamia Hamdard University, New Delhi (2022 – 2025) |
Aggregate: 71%

PROJECTS

Encrypted Chat Application (Python)

- Developed a secure chat application using Python sockets and threading to handle multiple clients.
- Implemented Fernet encryption for end-to-end message security.
- Created modular architecture with separate config and encryption utilities for scalability.

Heart Disease Prediction Web App (Flask + ML)

- Built a predictive model using Logistic Regression and Random Forest, selecting the best via AUC score

- Integrated SHAP explainability and multiple data visualizations (confusion matrix, feature importance, correlation heatmap).
- Designed a responsive UI with HTML, CSS, and Chart.js for interactive results.

Android Quiz Game App (Kotlin + Firebase)

- Developed an interactive quiz game with Firebase Authentication for email/password and Google Sign-In.
- Implemented session management and secure sign-out flow for multiple authentication methods.
- Designed a user-friendly interface using ViewBinding and intuitive navigation.

CERTIFICATIONS

- IBM Machine Learning – Coursera
- SQL Advanced Certification – HackerRank
- Data Analytics & Visualization Simulation – Tata Forage
- IBM Python – Coursera
- IBM Data Visualisation – Coursera
